

How to use your medicine

Eye Ointment

香港浸信會醫院
Hong Kong Baptist Hospital

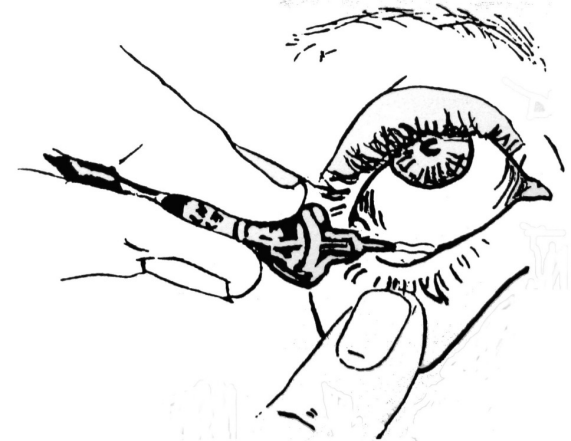

- (1) Wash hands and then gently clean the eyelids.

- (2) Lean the head backwards, gently pull the lower lid downwards, and direct your gaze upwards.

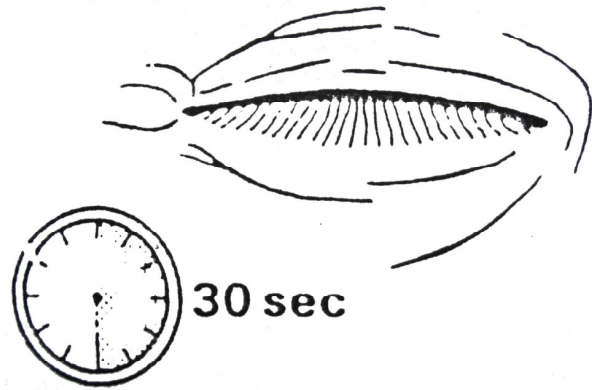

- (3) Carefully place a thin line of ointment along the inside of the lower eyelid. Avoid touching the eyelid with the tube nozzle if possible.

- (4) Close your eyes, and move the eyeball from side to side. Gently massage will also help to spread the ointment. Remove any discharges of the

ointment by gauze or tissue.

they should be put in at least 5-10 minutes apart.

(7) Replace the cap immediately after use and store in a proper place.

(5) Initially your vision may be blurred, but will soon be cleared by blinking. Do not rub the eye at this stage.

IF AFFECTED DO NOT DRIVE OR OPERATE MACHINERY.

(6) If other eye drops are also used together,

Attentions :

- (I) Discarded after 4 weeks of opening.**
- (II) Do not share the eye ointment with anyone else.**
- (III) Complete the whole course, or follow your doctor's advice.**
