

Breast Care Centre 乳房健康中心

Breast Care Centre 乳房健康中心

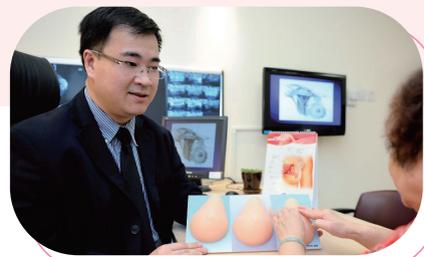

And now these three remain: faith, hope and love.
But the greatest of these is love.
[1 Corinthians 13:13 NIV]

Introduction

Breast cancer is the most common female cancer in Hong Kong. Since 2016, over 4,000 women are diagnosed of breast cancer annually, and the number of new cases has increased at an alarming rate of 76.4%* within a decade. Moreover, there is an increasing incidence of breast cancer among the younger age group. Hong Kong Baptist Hospital thus found the Breast Care Centre in 2010 with a view to actively promoting breast health and providing holistic care to patients with support and advice for clients throughout the investigation, diagnosis and treatment of breast-related problems, particularly breast cancer.

* According to Overview of Hong Kong Cancer Statistics 2016 - 2018 published by Hong Kong Cancer Registry, Hospital Authority

Our team which comprises of experienced surgeons, nuclear medicine specialists, oncologists, radiologists, pathologists and plastic surgeons, as well as nurses specialized in breast care, chaplains and patient support group, provides expert screening, diagnosis, disease management, pre- and post-operative care as well as counselling services to patients through a multidisciplinary approach.

Scope of Services

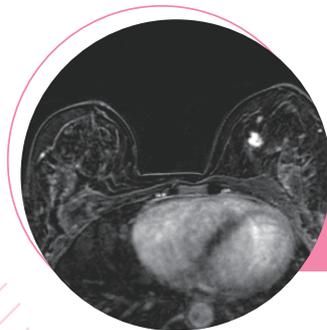

Breast Screening
Breast Screening Packages at special rate are offered to women over 40 to undergo breast screening so as to detect cancer at early stage.

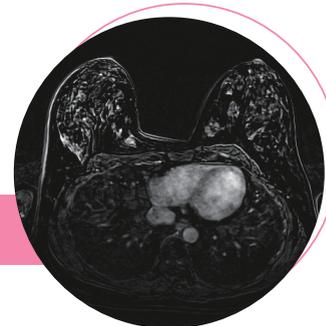

3D Mammography

Triple Assessment

Our experienced specialist will carry out triple assessments with investigations for diagnosis including mammogram, Ultrasound breast, and biopsy if necessary, so as to achieve the aim of early detection and carrying out necessary treatment.

Suspicious breast mass is clearly demonstrated by MRI

MRI shows normal breast tissue

Pre & post-operative care for breast disease

In accordance with our Hospital's motto "In the Glory of God, For the Service of Man", the Centre is dedicated to providing holistic care to patients with which their physical, emotional, and spiritual well-being are being taken care of.

Breast Screening Promotion Package

It is believed that early detection is crucial to enabling simpler treatment, as well as enhancing the recovery rate. Therefore, we offer breast screening packages at special rate in encouraging women to develop habits of regular breast screenings. Please call Breast Care Centre for more information.

Remark: Breast Screening Package is not suitable for women who have history of breast surgery (including Breast Plastic Surgery) and women with symptoms.

Investigations and Diagnosis

Various latest investigation modalities including 3D Mammography, Full Field Digital Mammography, Magnetic Resonance Imaging (MRI), Ultrasound Breast Imaging, Fine Needle Aspiration, Core Biopsy, Mammotome® and Hook-wire localization biopsy are available. Prompt selection and arrangement of the most suitable modalities are conducted to meet the special needs of each patient.

Prone Table Stereotactic System

Treatment

• Benign Breast Conditions
In general, most of the lumps in breasts are benign. One-stop diagnosis, treatment and advice are available to patients who have benign breast conditions including fibroadenoma, cysts, breast pain and so forth.

• Breast Cancer
Some lumps which grow in an uncontrolled way and damage normal breast tissues are malignant. Cancer may also spread to the other parts of the body through blood or lymph vessels. Breast Care Center is dedicated to providing holistic care to patients with which their physical, emotional, and spiritual well-being are being taken care of.

We emphasize on holistic care with the adoption of multidisciplinary approach. A comprehensive management plan, which consists of pre-operative counseling, surgery, reconstruction, adjuvant therapy, wound care, physiotherapy and surveillance program, is tailor-made for each patient by our experienced specialists on a timely basis.

Breast problem is a common yet unique disease that requires comprehensive and specialized care. We strive to provide quality service and holistic care to meet the physical and psychological needs of patients and their families.

Education & Support

Breast health awareness is of paramount importance to preventing and combating breast cancer, therefore we proactively provide essential information and education to promote breast health.

Our Breast Cancer Patient Support Group was established in June 1997 and named as 「心怡舍」in 2010. It promotes peer support through gathering and experience sharing, and provides reassurance and encouragement to new patients. Educational talks are also held to promote breast health to public.

* For referral cases, please call our Centre for more information.
