

## **Thermage**

# **Procedure Information Sheet**

#### Introduction

The Thermage procedure is a non-invasive treatment that delivers tighter skin, renewed facial contours and healthier collagen after one treatment.

Use a sophisticated treatment tip called Therma Tip, which delivers a controlled amount of CRF energy. This deep uniform heating action causes deep structures in your skin to tighten.

Over time, new and remodeled collagen is produced to further tighten skin, resulting in healthier; smoother skin and a more youthful appearance.

# **Before the Operation / Procedure**

- 1. Make sure not pregnant, and not implanted with a cardiac pacemaker, defibrillator, other electrical equipments or metal accessories.
- 2. With each touch of the Thermage Tip device, patient will experience a brief, deep heating sensation as the RF energy is delivered to the skin and underlying tissue.
- 3. There is no guarantee in the degree of improvement of results of this therapy, as results vary from person to person.
- 4. Taking photographs is required before and after treatment.

#### After the Operation / Procedure

Wash treated area with warm water within one week.

## **Risk and Complication**

- 1. Risk and complications of treatment include but not limited to redness, swelling, skin burn, blistering, scarring, skin indentation, tenderness and altered sensation.
- 2. Hypopigmentation and hyperpigmentation may last 1-3 months or longer, depends on your skin type.

#### **Disclaimer**

This leaflet only provides general information pertaining to this operation / procedure. While common risks and complications are described, the list is not exhaustive, and the degree of risk could also vary between patients. Please contact your doctor for detailed information and specific enquiry.
