## 整形外科及皮膚科中心

整形外科及皮膚科中心  
Plastic Surgery and Skin Centre

When I called, you answered me; you greatly emboldened me.  
*Psalm 138:3*

Plastic surgery is a surgical specialty dedicated to reconstruction of soft tissue defects, correction of congenital or acquired deformities in order to restore function and normal appearance. Our expertise in soft tissue reconstruction and surgical finesse put us in a unique position in the field of cosmetic surgery where precision in surgical judgement and execution is of paramount importance. Plastic surgery is not bounded by anatomy and we treat the whole body from head to toe. Plastic surgery is not limited to surgery only. We offer the most suitable treatment according to patient's individual needs. Safety comes first in our clinic and we will never trade safety for profits or convenience.
